DATA ANALYST: I ANALYZE DATA.

EVERFI | Data Analyst October 2016-December 2018

Developed research plans to explain data and research methods. Wrote survey and assessment questions to test product users' attitudes and behaviors. Managed up to 2,000 statistical insights on product users' responses to surveys to prove social return on investment. Visualized the results of statistical analyses on over 50,000 students to inform efficacy research with external vendors. Built dashboards with tools to provide canned reports of customer segmentations. Worked cross-functionally in the organization to generate platform requirements and specifications. Produced ideas for how to create metadata to improve survey and assessment data management. Managed technical knowledge using online tools to ensure understanding of work across teams. Trained and coached colleagues on database tools.

Compass Pro Bono | Strategic Alignment Consultant October 2016-May 2019

Developed survey questions to engage with clients. Organized conversation guides to prepare for partnering with clients. Led focus groups and 20 interviews to gather information on organizations' staff and stakeholders that aid in giving creating strategic recommendations. Managed and interpreted data aligned with client's goals to deliver strategic recommendations to non-profits. Created a kit of resources used to develop a database of records.
